

Pre-task Briefing - Be Prepared

This Safety Talk is designed to lead open discussion on *Pre-task Briefing*. Pre-task briefing provides all workers with the opportunity to share what they think could happen during the shift, and to provide suggestions on how to be prepared if/when that situation occurred.

SASWH recommends that workplaces/work units have written protocols in place. This Safety Talk may provide the opportunity for workers to suggest situations where protocols would assist in creating and maintaining a safe workplace.

What could possibly happen?	How can we be prepared?
