

TLR Independent Mobility

This technique is for the client who:

- is able to transfer or reposition themselves with or without the use of assistive devices such as a cane or walker, AND
- does not require any verbal guidance, cuing or stabilizing in order to safely perform the move on their own

At the time of the move and for the duration of the move the client is able to achieve all of the following:

- bear their body weight through part(s) of their body
- display sound judgement
- is predictable and reliable in performance and behaviour
- requires no physical hands-on assistance from the worker(s) with mobility
- requires no verbal assistance with guiding, cuing or stabilizing
- requires no assistance with equipment, attachments or assistive devices

Workers always consider the risk of abusive/violent behaviour, be trained to recognize potentially violent situations, as well as how to respond to and report violent incidents.

Refer to the TLR User Manual for additional information
